It needs no praise of Mr. Allen at this late hour, from us to suggest to the voters of this Congressional District, his worth or his fidelity as our Representative, to the trust which the people committed to his care two years ago. The high respect which he has won from all parties, officially minent position which he holds in the front rank in that august body of men, to which he belongs, are all the commendathat he is a safe and competent man to legislate on the many important interest which are involved in the movements and action of Congress. For his distinguished services in the past, he should be returned by a majority three fold greater than he received before. To all, then, we say, vote for Captain E. P. Thanks. It is with feelings of pride and gratitude that I thank the citizens of Ypsilanti and vicinity for the very cordial and hearty manner in which they aided me, both by their presence and otherwise, in making the fifth anniversary of The Cleary Business College a success. While especially thanking the ladies who had charge of the banquet for the efficient manner in which they carried out their part of the program, and the Pease quartet for enlivening the exercises with music's sweetest strains, no less are the citizens in general deserving of praise for the great interest and appreciation manifested and for the courtesy extended our guests. Such interest and appreciation stimulate me to put forth even greater efforts in building up a school that will be a credit not only to Ypsilanti, but to the state and nation as well. I regret that our accommodations were not sufficiently ample for all who came to participate in the evening's entertainment, but another year better facilities are hoped for. Very respecifully,

P. R. CLEARY.

An Abominable Affair. The Notorious Newell Block property

at the depot contributed its usual weekly ow last Saturday night, and one more unspeakably scandalous, than we ever before found occasion to record. A negro named Ike Brooks, and a negro woman, Mrs. Bob Beeler, both extremely drunk, were in the alley alongside the Newell Block, about 9 o'clock, engaged in a scuffle and surrounded by an idle crowd of white and black. The particulars are impossible to report in newspaper, but we hope the citizens of Ypsilanti will inform themselves upon it, that they may know something of what goes on in the streets of their city. It ended in a fight between the two, made more conspicuous by the filthiest and most blasphemous language from the lips of Mrs. Beeler and another colored woman, shouted so as to be heard all over the neighborhood. Two little white girls stood looking at the scene and listening to the talk in wide-eyed wonder. Stores were emptied of customers, and every decent person was scandalized. Finally, two officers, with the assistance of one or two leputies, arrested Brooks and succeeded in getting him to the lockup, the Beeler woman following with horrid imprecations and obscene vituperation. When he was ocked up, an officer gallantly escorted her back through the street, she loudly swear ing she would not go home until he bought her a drink. She was induced to go home. Brooks was brought before Esq. Joslyn's court Monday morning and fined \$5, for The presence in the same week of Lieut an offense that should have sent him to the penitentiary. To-morrow and the next day, Friday and Saturday of this week, Nov. 2 and 3, every voter in the city of Ypsilanti must register his name in the ward in which he resides, or he cannot vote next Tuesday. The only exceptions are those who may be absent from the city on those days, or prevented by physical disability from attending. ' The Rights of Voters.

It is the lawful right of every citizen to witness the registration, and to see the of the national secretary of the American lists wherever any omission or improper registration is suspected. It is also the fuse to hand his ticket to an inspector where the box is not plainly in view. If he box, the inspectors must allow him to do so, and he cannot be fenced away from access to the box for that purpose, by windows or railings or loungers. The fifth ward poll in this city has been habitually objectionable in these respects, and ought to be looked after. The republicans of the ward can enforce their rights, and the punish any citizen or officer who shall in-

THE CHIMES OF AMSTERDAM.

Far up above the city,
In the gray old belfry tower,
The chimes ring out their music
Each day at the twilight hour;
Above the din and the tumult,
And the rush of the busy street,
You can hear their solemn voices,
In an anthem clear and sweet.

When the busy day is dying,
And the sunset gates, flung wide,
Mark a path of crimson glory
Upon the restless tide,
As the white-winged ships drop anchor,
And furl their snowy sails,
While the purple twilight gathers,
And the glowing crimson pales.

Then from the old gray belfry,

The chimes peal out again,
And a hush succeeds the tumult,
As they ring their sweet refrain;
No sound of discordant clangor
Mars the perfect melody,
But each, attuned by a master hand,
Has its place in the harmony. I climbed the winding stairway

That led to the belfry tower,
As the sinking sun in the westward
Heralded twilight's bour;
For I thought that surely the music
Would be clearer and sweeter far
Than when through the din of the city
It seemed to float from afar,

But lo. as I neared the belfry,
No sound of music was there,
Only a brazen clangor
Disturbed the quiet air!
The ringer stool at a keyboard,
Far down beneath the chimes,
And patiently struck the noisy keys,
As he had uncounted times.

He had never heard the music,
Though every day it swept
Out over the sea and the city,
And in lingering echoes crept.
He knew not how many sorrows
Were cheered by the evening strain,
And how men paused to listen
As they heard the sweet refrain.

He only knew his duty, But he did it with patient care; But he could not hear the musi That flooded the quiet air; Only the jar and the clamor Fell harshly on his ear.

And he missed the mellow chiming.

That every one else could hear.

So we from our quiet watch-towers May be sending a sweet refrain, And gladdening the lives of the lowly, Though we hear not a single strain. Our work may seem but a discord,
Though we do the best we can.
But others will hear the music,
If we carry out God's plan.

Far above a world of sorrow,
And o'er the eternal sea,
It will blend with angelic anthem, In sweetest harmony;
It will ring in lingering echoes,
Through the corridors of the sky,
And the strains of earth's minor music

## Will swell the strains on high. -Minnie E. Kenney, in the Congregationalist. Rob's Opportunity.

Rob Dayton was putting himself inside the overcoat which, as his mother saw with some concern, was daily growing too small for him. Perhaps it would be more correct to say that Rob was growing too large for it. Certainly his legs and arms were pushing their way in the world vigorously, and the boy gave promise of becoming a tall fellow, as his father had been;

strong, too, and able to hold his own. "You'll never get your money's worth out of that coat, Robert," said Mrs. Dayton, sighing as she held her flat-iron near her cheek to test the degree of heat before pressing it on the dainty baby's dress which lay upon her skirt-board.

"La, me, mother!" exclaimed Rob's sister Kate, looking up from her sewing with a merry laugh, "how you do borrow trouble, to be sure. Dorothy had been away at school for a month, and was going home today to stay until Monday. Once a month, on Friday afternoon, she had that privilege. She was a pretty little girl, plump and dimpled, with pinktinted cheeks, yellow hair, and laughing brown eyes. When Rob had sold his last sandwich, and his last apple, he put his basket away, came and sat by her side, and the two children chattered precisely as if Rob had been Dolly's big brother, or rather, Dolly chatted and Rob listened, now and then gravely putting in a word.

She was telling him of Chico, her pug, and how glad he always was to see her coming home, of the gold medal she hoped to win, and of the severity of her music master, mixing one thing and another in Dolly's own way, when suddenly the gay little tongue was arrested. Thump! Bang! Bounce! Something was the matter. Now that there are more, far mor e, English women than there are Englishmen, it is surely time that we should look things in the face and recognize the fact that there are too many of to be disposed of matrimonially. With a sentiment that was partly composed of chivalry, and partly arose from reluctance to place women on the same intellectual footing with themselves, men have for centuries kept us back, supported us by their own labors, and surrounded us with every comfort possible to their efforts, denying us only the delicious luxury of independence. Legally, we were classed with children and fools. Until a few years ago, women with husbands had no property of their own. Every thing belonged to the male partner in the unequal bargain. The laws concerning us were framed upon the supposition that we were unfit to deal with property.

But of late a juster and more equitable state of things has come about, thanks to the kindly exertions of some few men, who perceived the injustice of treating women as though they were idiots. But men at large are now beginning to reap the harvest they themselves have sown. Had daughters been given half the chances bestowed as a matter of course upon sons, the present generation of girls would be least as self-supporting as their brothers. But fathers have not yet awakened to the truth that their daughters could and would make their way in the world quite as well as the sons. The outcry as to what they shall do with their daughters is merely the natural consequence of what they have done with them hitherto. The ordinary father thinks he has done all his duty by his girls if he has them well-educated at some fashionable school, where every girl is taught exactly the same things quite apart from her special capacities or her individual tastes.

The sons are brought up to professions, as a matter of course. Money is lavished on them; so much money, in fact, that the father is often unable to execute the insurance on his life that would make some provision for his daughters in the event of his death. We all know what happens when the bread-winner dies. No need to describe the miseries endured by girls who have always been sheltered in a happy home, and who find themselves thrown on the cold world without any

ment against its rigors. But fathers are now beginning to awake to the exigences of the case. Sensible men realize that the education obtainable at the ordinary fashionable schools is no education at all in the true sense of the word. It is a laying on rather than a bringing out. What a girl needs is that whatever talent lies within her shall be brought forth, developed and cultivated to very highest pitch of perfection. What is her favor te pursuit, next to novel reading, tennis playing and consuming Every girl has some special aptitude, and in it should be recognized the germ of future independ-

The false notes that jar upon the sensitive. musical ear; the heavy, soulless touch; the repetition of precisely the same mistakes, notwithstanding constant correction; these things must make the life of a music teacher a hard one. And why should every girl be taught to play on the piano?

It is by no means the ideal instrument at its best, and nowadays no one who can help it, ever listens to an amateur. The time that is devoted to such lessons would be much better spent in learning some more congenial

for such as these. Thoroughness, even in some simple matter, develops conscientiousness, which, indeed, may be

called a part of true thoroughness. And what a rare treasure is the conscientious, thorough woman when found! England is full of failures. both men and women, who have failed from lack of this very quality. That women should fail is only to be expected, for they have enjoyed no advantages of training or special education as men have. It is almost impossible to get a good governess who combines with the talent of teaching the no less mportant faculty of moral training. The great mass of nursery governesses and companions are absolutely inefficient, these two occupations being only resorted to by those who are quite

ncompetent to follow any other. It is almost equally difficult to find a satisfactory dress-maker or seamstress. They are nearly all superficial and unhrorough, to coin a word. But with pecial training and technical teachng a new era may be hoped for. Women have been wasted, for the most part, until now, and with the development of their working faculties will come a great surprise for those who have for so long a period underrated their powers. Woman has till lately been regarded rather in the light of a cadenza in music, or a flourish in calgraphy; something ornamental which has no absolute raison d'etre and

which could easily be spared. There is just this germ of truth in the idea that we are certainly supplementry, so to speak; and in looking about for occupation we must bear that fact in mind, and seek for work that is supplementary to that of men. shall thus have a better chance of success than we would be likely to secure by coming directly into competition with them. This idea may seem abject and "very 'umble" to some of the strong-minded ladies of whom we wot, and whose device appears to be aut Cæsar, aut nullus; but, after all, there are thousands of women who prefer the situation of Cæsar's wife to being Cæsar himself; and who, from choice, select those occupations that appeal to the more graceful fancy of a woman, that need her lighter touch, her delicate sense of neatness and order, and appeal to her especially just because she is an educated gentlewoman, and

not a man. Twenty years hence it will be found that numbers of new and now undreamed-of occupations will be open to Englishwomen, and they will be able to rejoice in the pleasing circumstance that no man need bewail the surplus of unmarried women, but rather that all sensible male beings (there will be more of that sort then) will congratulate temselves upon the fact that there is an unmarried surplus to make the outside world pleasanter and brighter. and to make many things go smoothly that now jar and creak and work unsatisfactorily for want of the gentle and discriminating touch of the welltrained fem ne hand. -Mrs. Humphrey, in London Society.

## Some Striking Contrasts.

An English lady living temporarily in the United States notices that the house servants do a deal more work here than in the old country; yet that our servants are relieved of some work that is necessary there-the taking of hot and cold water to sleepingrooms in some houses, and the care of a fire in every room by reason of no furnace in the cellar. She insists upon the superiority of stoves here over fire-places in England in cold weather, and says that the kitchen stove here burns much less coal than it does there. The use of bituminous coal in England is one cause of some of these troubles. The independence of the domestic servants in America is another noticeable fact, as might be expected in a democratic country. As a sample of the greater conveniences here, the carpet sweeper is mentioned, with its dustless work, in place of a proom, which is solely used in Eng-

It is probably derived from the old English word bottel, a bunch or a bundle, as a bottel of straw. . The whole kit and boodle of them' is a New England expression in common use and the word in this sense means the whole lot. Latterly boodle has come to be somewhat synonymous with the word pile, a term in use at the gaming table, and signifying a quantity of money. In the gaming sense, when a man has 'lost his boodle,' he has lost his pile or a whole lot of money, whatever amount he happened to have with him. "I suspect," he replied, "it principally because I was a rabid antislavery man, although the fact that I had previously been the publisher of a book by the Rev. Henry Ward Beecher may have had something to do with it. After a careful examination I concluded that the story would not only repay the cost of publication in book form but would yield some profit. Possibly I was helped to that conclusion by my firm conviction that the volume would prove a strong anti-slavery document. Some other points in the history of "Uncle Tom's Cabin" are interesting. The author had accompanied her husband to Brunswick, Me., where he had been appointed a professor in Bowdoin College, and while there she began writing (1851) her famous novel in weekly installments for the National Era, writing it in the midst of domestic cares and duties, wholly inimical to composition. The Girl With Black Eyes.

Three days and three nights has her picture like a calico clad apparation all this time before our thoughts haunted us and distilled pain into the jar which the heart appears to always have open to catch the drops as they fall.

Sitting beside Superintendent Blake, who these many years, in the general office of the commissioners of correction of New York city has had thousands of heart-broken evidences of man's inhumanity to man, to man's offspring, pass before him as the faithful expect to pass in review before St. Peter. I saw the young, the middle-aged, the adult, blind, ame, bruised and ragged pass along in line, stop before his desk and briefly tell him their errands and ask his advice.

That was four days ago. Of his official duties and the faithful, heartsome way they are performed, another time

Among those who come, all to many with tear-wet faces, was one girl not yet seventeen years old. Her hair was brown, long and silken. Her face was well favored, and her voice was that of a sweet, lovable dispositioned girl. Her eyes were as brown as was her hair. She left the home of her Cornish parents in a mining town not far from Scranton, not two years ago, to prove the worth or wickedness of a gambler who lured her so far from her widowed mother and the good way that she dare not

She stood before the desk, which is a high one, so that her head and eyes were above it. Invited to come inside behind the railing, and thence into a small room whose walls have been kalsomined thousands of times with the sighs and sobs of the wronged and ruined, this girl with the black eyes told her story.

Near Scranton, in her home, she was worked, half starved wives. Her father died, and her mother went dazed with grief as she looked through her own eyes and the eyes of her four children into the future, trying in vain to see a to be worse than murdered.

What could she, a pretty girl of fifteen do to help? A well dressed man came to her mother's home to offer to find a good place for the girl if she could be spared.

He was a stranger, but he told of people whom the mother knew. He offered to obtain an excellent position for to defray her expenses to the home of his friends in New York, who had asked good girl from the country. But in Scott's Emulsion of Cod Liver Oil with Hypophosphites the two are combined, and the effect is wonderful. Thousands who have received no permanent benefit from other preparations have been cured by this. Scott's Emulsion is perfectly palatable and is easily digested by those who can not tolerate plain Cod Liver Oil.

Prohibition Platform, 1888. The Prohibition party in national convention assembled, acknowledging Almighty God as the source of all government, does hereby declare:

4 For the immediate abolition of the internal revenue system, whereby our national government is deriving support from our greatest national vice,

THE average democrat sees great wealth in exchanging our commodities for English commodities of the same kind, but they forget that commerce is mutually profitable only when each nation has what the other has not, and yet needs. No one but a free trader can see any sense in loading up a cargo of American steel rails, and toting them across the ocean, and bringing back, in exchange, a load of English steel rails of same quality. It is no trouble for these economic philosophers to explain how two boys can trade vests and each make five dollars by the transaction. England neither grows nor produces anything we do not grow or produce, and exchange to profit can only exist where she is deficient in what we have to spare. England wants free trade with us simply because she has an advantage over us in the cost of production, and that advantage arises from her lower scale of wages. By pauperizing her labor, she hopes to force our trade, and it is currently reported that a few laboring men here are going to help her, by their votes, to transfer the work which should be done in our own shops, to foreign workshops. Not many we trust are

so blind to their own interests.

HIS AUTHORITY WAS NOT GOOD.

promptly challenged Mr. Stearns' authority | itself: on the Texas wool clip, and declared that the card of Louis S. Fiske & Co., wool commission merchants of Philadelphia, which he submitted in support of his statements, was wildly incorrect, giving that state twelve million pounds more than any other estimate, and twenty millions more than any official statistics. We made the point against Mr. Stearns that he showed himself far too ignorant and careless to be entrusted with such important interests as devolve upon a Representative in Congress, if he could innocently use such palpably erroneous and ridiculous statements. The Commercial of this city, with blind and eager haste, tumbled into Mr. Stearns' pit, and with even greater innocence quoted in support of his position the official statistics that conclusively refuted it. So did

the blind lead the blind. Somebody has now done us the kindness to send to Messrs. Fiske & Co., as we infer, a copy of our paper containing that matter; for there came to us last Saturday evening the following telegram, which we take much pleasure in laying before our

MORE LIES NAILED.

We lately exploded the yarn about Ames shovels being sold in Mexico cheaper than in the United States, and published the emphatic denial of Mr. Oliver Ames himself, who declares that he has sold no shovels in Mexico at all, and that they are sold nowhere cheaper than the regular price to American dealers.

A late report of the State Department gives the report of the American Consul at London, Ontario, that a prominent Canadian farmer had bought a Walter A. Wood reaper for \$110, the machine costing here \$150 or more. Congressman Hatch of Missouri repeated the statement on the floor of the House. Now Mr. Walter A. Wood announces that he has called upon Consul Washington, of London, for a statement of names and localities to sustain the story, and the Consul replies that he cannot give them without the order of the Stale Department; and Mr. Wood thereupon declares his belief that the story is untrue; that neither he nor any of his agents has sold any machine in Canada; that he has no trade in that country, and that because of the Canadian duty of 35 per cent on such implements, all of the harvesters used in Canada are made there. Furthermore, he says that the \$110 named in the story is below his wholesale price to agents, and that the reapers he sells in foreign countries are always sold for a higher price than those in this country, and are commonly more costly machines. The letter is too long for us to print. It is dated Hoosick Falls, Oct. 15, and signed, Walter A. Wood, president; Chas. M. Coulter, secretary.

A son of Owen Lovejoy, the martyred abolitionst, is the democratic nominee for congress in Illiois.—Ann Arbor Argus.

Well! if the Argus will observe the returns from the 7th district of Illinois, where this son of Owen Lovejoy lives, it will discover that the voters of that district reject him by 5000 majority—the district that knew and loved and elected Owen Lovejoy and reveres his memory; and if it will further observe it will discover that Bureau county and the city of Princeton, where young Lovejoy lives in the old homestead, also reject him by emphatic majorities. And if the Argus will consult history it will find that Owen Lovejoy died in Congress, and was not martyred. His brother, Elijah Lovejoy, was murdered by the democrats of Alton, Ill., for publishing an abolition paper, and his press thrown into the Mississippi River. The Argus awakens unpleasant memories when it speaks of "Lovejoy, the

THE WEST EPISODE ollowing correspondence explain

Mr. Cleveland enable me on my own responsibility, to assure many of our countrymen that they would do England a service by voting for Cleveland and against the Republican system of tariff. As I before observed, we know what to do, but look for more light on a mysterious subject which the sooner it comes will better serve true Englishmen in casting their votes.

Yours, very respectfully.

BEVERLY, Mass., Sept. 13, 1888.
Sir—I am in receipt of your letter of the 4th inst., and beg to say that I fully appresists the different properties of the different properties. ciate the difficulty in which you find your-self in casting your vote. You are prob-ably aware that any political party which openly favored the mother country at the present moment would lose popularity, and that the party in power is fully aware of this fact. The party, however, is, I believe, still desirous of maintaining friendly reations with Great Britain, and is still as desirous of settling all questions with Can-ada, which have been unfortunately repened since the retraction of the treaty by the republican majority in the Senate, and by the President's message, to which you allude. All allowances must, there-fore, be made for the political situation as regards the Presidential election thus created. It is, however, impossible to predict the course which President Cleveland may ursue in the matter of retaliation, should ne be elected; but there is every reason to believe that, while upholding the position he has taken, he will manifest a spirit of onciliation in dealing with the question nvolved in his message. I enclos ticle from the New York Times of August 22, and remain yours faithfully, L. S. SACKVILLE WEST.

This developement caused a tremen dous commotion in the democrat camp. It was official confirmation from the high est source that the republicans have been correct in charging that the administration policy had been such as to win the sympathy of Her Majesty's Government, as opposed to the republican policy. Something must be done to divert attention from that significant fact, and they fell to abusing Lord Sackville and Mr. Murchison, and charging republicans with a base trick in entrapping His Ludship. They seemed as it may indeed depend, upon his single to think that if they made noise enough on those lines, the people would fail to realize that it was quite unimportant whether the British minister had been indiscreet or impertinent, or not; whether Mr. Murchinson had been insincere and tricky, or not; whether any republican had set a trap for minister West, or not. They thought that if they could sufficienty divert attention to these things, people might not see that the significant thing in the business, and the only significant thing, was, that the chief representative of Her Majesty's Government did express sympathy with Cleveland as a candidate for reëlection against Gen. Harrison, and practically advise his correspondent to vote that way, as promotive of British interests; and not all the bluster of democrat papers and of Secretary Bayard and President Cleveland himself, can change

MR. STEARNS' NEW DOCTRINE.

Tuesday morning's Free Press contains list of questions propounded to Mr Willard Stearns, democrat candidate for Congress in this district, and the categorical answers of Mr. Stearns thereto. No 7 in that list is the following:

"7. Will you, if elected, work and vote for measure to prevent the employment of convict labor on public buildings, and the use of material prepared by convict labor?

"Answer-Yes; and go further too. I papers from being employed in any municistrikers, until justice of the strike is arbitra-

ed in court." So! Then the doctrine of Mr. Stearns will be, if he should get to Congress, that a foreigner coming to this country to become a citizen, taking out his first papers and casting a vote for Mr. Stearns, as under the laws of Michigan he may when he has been here two years and six months, must remain here five years and get his "full papers" before he should be "employed in any municipal corporation, mine or factory" Whether he would allow the girls, who never have "full papers," to work in our

mills and factories, seems quite uncertain. Isn't that an astonishing utterance, for a man aspiring to the high position of a national law maker! and how many voters are going to prefer him at the ballot box labor.

to Capt. Allen? Every man who votes for Cleveland and Thurman, votes to justify the dishonorable and cruel treatment of John Roach which broke the grand old Irishman's heart and sent him to a premature grave, while at the same time, it destroyed the only ship-yard worthy the name in the country.

Every man who votes for Cleveland and Thurman, votes to sustain the administration in keeping in position of trust panelectric Garland who accepted as a gift with Thatcher's Orange Butter Color. \$1,500,000 worth of corporate stock, with This is the case at hundreds of State and \$1,500,000 worth of corporate stock, with the implied understanding that his official influence should be used to give value to out it. intervening, a contest in many respects unexampled in history will be determined. The mightiest jury that ever deliberated upon any question will render its verdict. Eleven million voters will declare their choice between competing candidates and contending policies, and the welfare of this nation will be mightily affected, fa-

vorably or unfavorably, by that verdict. The issue is fully made up. Little new light can be shed upon it. Roorbacks may be sprung upon the public attention, and schemes to excite prejudice or divert attention may be developed, but the ques tion to be decided on election day can scarcely be changed or modified from what is to day. The question is single and simple. It is, whether the financial and industrial policy under which this country has advanced in its material and social interests at a rate wholly unparalleled, and under which it has achieved a comfort and prosperity for its people ex ceeding that of any other nation or people on the face of the earth, shall be continued, or whether it shall be reversed and the experiment of an opposing policy be tried. That is the question, naked, definite, clear: and it so overshadows for the time all other questions, that no considerable atention can be anywhere gained for anything else. The verdict will be upon that and only incidentally upon any other.

The republican party has always been the defender of that policy, and stands in this contest unequivocally for its maintenance. The democrat party has always been the enemy of that policy, and entered this contest with an unequivocal demand for its overthrow. As the campaign progressed, it became apparent that the peo ple would not endorse that demand, and a process of hedging was commenced. Their papers and speakers still denounced the protection system as iniquitious, but denied that they intended to destroy it. They have been far from unanimous in this. Some still demand its total destruc tion; some would destroy it less, and some would destroy it only a little. So the democrat position is not now unequivocal But the fact remains that that party is the traditional enemy of the protective system, always seeking to overthrow it just as far as it could, and the republican party is the traditional friend and promoter of that system and has always been successful in upholding it.

There is no occasion for further debat ng the theories that underlie these conflicting systems, or seeking further evidence to sustain or to combat. No one denies the fact of our great prosperity and the marvelous growth of our widespread and diversfied industries, under the protective policy that has prevailed; and the voters must chose between the maintenance of the system under which all this is achieved, and the bare theory that an opposing policy might prove to be better. Every voter assumes a solemn responsibility in casting his ballot, and he ought to feel that that responsibility is no less than the casting of the deciding vote which shall determine the issue. Every one should look at the fact and the theory, side by side, and then choose between them with all the conscientious judgment he can exercise, as if the issue depended,

> Stearns on the Workingmen Ann Arbor Courier

Two years ago Henry A. Robinson was nominated for Congress in the 1st district of this state by the Knights of labor and other laboring men, some 6,000 of whom signed a paper to support him at the polls. This is what Mr. Stearns said about them in his paper, the Adrian Press:

"He is the candidate of Socialists and Anarchists. They first named him. They are the ones who professed to have the naming of a candidate. They are no respect ors of law and order. Robinson is no bet

'He should be shunned as much as a Chicago bomb thrower."
"Robinson should be defeated by 10,000 majority in that district, and communism stamped out. You can't disguise the fact that it is a concession to one of the worst elements of social government to endorse

Robinson, and every man who has the honor of Wayne county at heart will labor to crush his candidacy. Has Mr. Stearns experienced a change of heart since then? Is he the friend of organized labor any more to-day than he was two years ago? Entertaining such bitter opinions, can he consistently ask la-

boring men to vote for him? THE Sentinel urges the support of Mr King because he is an Ypsilanti man That is the last reason in the world why any Ypsilanti man should vote for him. Those who prefer the election of the demcould prevent any person not having full ocrat candidate will properly cast their ballots for him; but the Normal School is not al corporation, mine or factory, and pre- a local institution, and we in Ypsilanti pent importing contract labor to replace can least of all afford to give such an ap pearance in the eyes of the state.

Every man who votes for Cleveland and Thurman, votes to approve the disgraceful prostitution of the mail service to partisan

Every man who votes for Cleveland and Thurman, votes to put the laboring man of this country upon the same low plane of wages as the pauperized labor of Europe. Every man who votes for Cleveland and Thurman, votes to lessen the demand for work in this country, and thereby deprive

LESSON V, FOURTH QUARTER, IN-TERNATIONAL SERIES, NOV. 4.

DEFEAT AT AI.

Text of the Lesson, Josh. wii, 1-12-Commit Versus 10-12-Golden Text, Ps. exix, 36-Commentary by Rev. D. M.

Condensed from Lesson Helper Quarterly, by permission of H. S. Hoffman, Philadelphia, pub-lisher.]

The promises of God are generally conditioned upon obedience and separation from sin on our part. "There shall not any man be able to stand before thee all the days of but the conditions were faith and obedience on his part (i, 6-9).

1. "The children of Israel committed a

trespass in the accursed thing" The city and all in it had been accursed, or devoted to utter destruction (vi, 17, margin, compared with v. 21, where "utterly destroyed" is the same word, and see also I Sam. xv, 21; Zach same word, and see also I Sam. xv, 21; Zach. xiv, 11), and the people had been forbidden to take for themselves anything of the accursed or devoted city. How fearful is the sin of disobedience, and how far reaching the effects of sin. One man

covets and takes that which he had been forbidden to touch, (v. 21) and the result is that the whole nation suffers because of a broken law through his sin. In the Garden of Eden there was only one tree which Adam and Eve were forbidden to touch, but the tempter came, and Eve saw and coveted and took and did eat; and gave also unto her husband with her and he did eat; and to this day the result is manifest.
2. "Ai and Bethel." These names carry

us back some five hundred years to the time when Abram first entered the land and having pitched his tent between Bethel and Ai, he builded an altar unto the Lord (Gen. xii, 8; xiii, 3), having Ai (the heap of ruins) behind him, and Bethel (the house of God) before him. At Bethel, as Jacob left his home, fleeing from Esau, God appeared to him in a vision, and there he erected and anointed a pillar; and twenty years later, as he returned with his wives and children, God appeared to him again at the same place, calling his name Israel, and confirming to him the covenant.

3. "Let not all the people go up; for they are but few." Such was the advice of the men sent to view the country, but they had not the mind of God, for his command was: "Take all the people of war with thee" (viii, 1). It was wretched self confidence, forgetfulness of God, and making light of difficulties. It will not do to make too much nor too little of the enemy; we must not be anxious nor discouraged, neither should we be careless or boastful; but having on the whole armor of God, we must ever be watchful, and especially when the occasion seems a little one. "Uzziah was marvelously helped

till he was strong; but when he was strong his heart was lifted up to his destruction."
(II Chr. xxvi, 15, 16.) 4. "They fled before the men of Ai." This was not according to the promise that one should chase a thousand and two put ten thousand to flight (Deut. xxxii, 30), but the fault was their own; they were unmindful of their Rock, and puffed up by the victory at Jericho, as if their arm had done it.

"The hearts of the people melted, and ecame as water." And yet it was not a ery great defeat; they had only lost thirty-300,000 ready for war. Why was this trembling of heart and this great and seemingly uncalled for fear? It was all through failing to see the Lord and hear His voice. He sent a faintness into their hearts, and the sound of a shaken leaf chased them (Lev. xxvi, 21, 36); there was sin in the camp, and it was unconfessed; not only the sin of self confidence and lack of reliance upon the Lord, but the sin of Achan was troubling all Israel.

6. "Joshua rent his clothes and fell to the earth upon his face before the ark." This was a new experience to him as the leader of Israel, and to humble himself before God was the right thing to do; but who can tell what the result might have been if Joshua and the elders of Israel had done this before setting out to attack Ai? Where was the man with the drawn sword, the captain of the Lord's host, all this time? Had he made a mistake, or failed them, or been defeated? No, He was simply left out, and they had gone without him, and He had

let them do it.
7. "Alas! O Lord God, wherefore hast thou?"— In this and the next two verses we have Joshua's prayer. He begins a little hastily and impatiently, for God had not brought them over Jordan to destroy them or to deliver them to the Amorites; but rather to deliver the Amorites unto them and give them all that good land. We are apt to say that God has brought us into this or that trial, when we have brought it upon ourselves by disobedience or by failing to collow Him. "Wisdom's ways are ways of leasantness, and all her paths are peace. 8. "O, Lord, what shall I say when Israel

turneth their backs before their enemies?"
There is more of a right spirit in this utterance, and would to God that we were more are overcome instead of being overcomers.

9. "What wilt Thou do unto Thy great name?" Joshua suggests the possibility of their name as a nation being cut off from the

earth and identifying them with Him, he asks this question. God had chosen Israel to make Him a name. (I Chron. xvii, 21.) The queen of Sheba came to Solomon because she heard of his fame concerning the name of the Lord. (I Kings x, 1.) So we should remember that we are chosen to bear His name, and in all things glorify Him. (Acts

ix, 15; 1 Peter ii, 9; iv, 11.)
10-11. "Get thee up; Israel hath sinned."
There is a time to pray and a time to act, a time to confess sin, and a time to rise and search out and put away sin. Joshua knew not the cause of Israel's failure, he went in humiliation and prayer to Him who is per-fect in knowledge, and now that God has revealed the matter to him, it is time for him to rise and put away the sin from Israel.

12. This then was the cause of Israel's failure and they could not stand before their enemies, much less subdue them, nor would the Lord be with them any more except the accursed thing be taken away and the accursed person be destroyed. So the tribes are brought before him, probably by their heads, and the lot falls upon Judah, them of the families of Judah the Zarhites are taken; of the Zarhites, Zabdi is taken; and of the household of Zabdi, Achan is taken. O Achan, why did you sin? Having sinned why did you not come and confess it without waiting to be found out? Were you not sure that your sin would find you out? (Num. xxxii, 23.) Did you not know that "he that covereth his sins shall not prosper, but whoso confesseth and forsaketh them shall have mercy?" (Prov. xxviii.) Why did you do it? For the sake of a little gold and silver and a goodly Babylonish garment. Tell me, dear reader, have you profited by the fall of Achan, or are you dishonoring the name of Christ and proving a hindrance rather than a blessing in your home or church or Sunday school, because you have an inordinate desire for goodly raiment, or that silver and gold, the love of which is the root of all evil?

## Constipation

Demands prompt treatment. The results of neglect may be serious. Avoid all harsh and drastic purgatives, the tendency of which is to weaken the bowels. The best remedy is Ayer's Pills. Being purely vegetable, their action is prompt and their effect always beneficial. They are an admirable Liver and After-dinner pill, and everywhere endorsed by the profession.

"Ayer's Pills are highly and universally spoken of by the people about here. I make daily use of them in my practice."—Dr. I. E. Fowler, Bridge-rest Conn. port, Conn.

"I can recommend Ayer's Pills above all others, having long proved their value as a cathartic for myself and family."—J. T. Hess, Leithsville, Pa. "For several years Ayer's Pills have been used in my family. We find them

troubles and indigestion, during many years, and have always found them prompt and efficient in their action."—L. N. Smith, Utica, N. Y. "I suffered from constipation which assumed such an obstinate form that I feared it would cause a stoppage of the bowels. Two boxes of Ayer's Pills effected a complete cure."—D. Burke, Saco, Me.

"I have used Ayer's Pills for the past thirty years and consider them an invaluable family medicine. I know of no better remedy for liver troubles, and have always found them a prompt cure for dyspepsia."—James Quinn, 90 Middle st., Hartford, Conn.

"Having been troubled with costiveness, which seems inevitable with persons of sedentary habits, I have tried Ayer's Pills, hoping for relief. I am glad to say that they have served me better than any other medicine. I arrive at this conclusion only after a faithful trial of their merits."—Samuel T. Jones, Oak st., Boston, Mass.

LIFE IN BRAZILIAN FORESTS.

A Naturalist Tells of His Adventures and His Ornithological Treasures.

Clarence B. Riker, a member of the American Ornithological society, has just returned from two months of bug and bird hunting in the forests of Brazil
"My wife and I," said Mr. Riker to a re porter, "went by steamer from here to Para at the mouth of the Amazon. There we changed to a smaller steamboat that took us up the river 500 miles to Santarem. There we took canoes and were paddled by Indian boys through miles of narrow channels that wind in and out through a vast region of flooded forest.

After we had gone as far as we could in canoes, an ox cart was backed hub deep into the water, and we transferred ourthe truth of which is vouched for by the residents of the town: "I am 73 years old, have been troubled with kidney complaint and lameness for many years; could not lress myself without help. Now I am fect shade, and the paths were as hard as our roads.

"When we arrived at the plantation which we had decided to make our headquarters, we found a comfortable house with concrete walls, a tiled roof and hammock beds. The planters have fowls, swine and cattle, and raise the principal vegetables and fruits that we have. The seeds of the palm tree are made into vari ous nourishing dishes. One of the staple articles of food is a fish called pirarucu. It is dried for market and resembles cod-fish. The natives live almost entirely on bananas and farinha, a coarse meal made from the mandioca root. Many of the planters raise sugar cane, and from it make whisky to supply to the rubber gatherers. The fermented juice of the palm is another drink used by the natives, and a delicious wine is made from a fruit

"There are very few musquitoes, but there are some things worse. The mocoene, an almost microscopic insect, clings to the flesh, and, if not removed by rum or lemon juice, causes severe iretter, chapped hands, chilblains, corns, and ritation. Large vampire bats often fly in one's face at night. They are four times the size of our bats. Many natives bear scars from their teeth.

"Tarantulas were frequently seen on the veranda, and sometimes in the house. Their bite is not considered deadly, but the minute hairs with which their barb is covered are poisonous, and cause terrible irritation. If we left the doors of the house open at night, large toads, weighing a pound and a half apiece, would hop in. One night my wife was awakened by hearing some animal moving in the room. We could see nothing, but from the sound we were sure that it must be a eiger or, at least, a wildcat. On striking a light, it turned out to be a 'possum.

"Alligators were plentiful in the brook near the house, and a deadly snake called siracucu is frequently found crouching in the paths of the forest. We captured a boa constrictor twenty-two feet long. Rattlesnakes are numerous on the campos

or open plains. 'Leaving my wife at the plantations, I made excursions into the forest in search of birds and insects. I generally went with three or four other Americans and several Indian guides. At night the Indians would make a thatched house out of palm leaves. When thirsty we would cut the root of the tapereba, which is hollow and contains nearly a pint of water. Game was plenty. There were wild hogs, tapir, monkeys, wild turkeys, peccaries and a great variety of birds. We frequently saw the tracks of jaguars near our hut, but did not meet any of them. To obtain some rare specimens of birds we penetrated far into the depths of the forest. I measured one palm leaf and found it to be forty feet in length. There were rosewood, mahogany and many woods not found elsewhere. In the flooded districts I saw sloths hanging upside down and feeding on the leaves of trees. Numerous butterflies, brightly colored, and birds with brilliant plumage abound. And on the banks of the rivers at evening I saw thousands of white egrets. I was very successful in collecting, as I brought back over 300 birds, 10,000 insects and the skeletons of ant eaters, sloths, American tigers, serpents and many other animals. I obtained a bow and five arrows, captured in a fight between rubber packers and a tribe of Parintintin Indians, who had attacked them. These Indians are perfectly wild, and live in the deep recesses of the forest. They are cannibals. I also brought home a young tiger. Its mother was shot while feeding on an ox which she had killed. To keep the tiger company I brought a large coatia or spider monkey. He was caught when young, and is now entirely domesticated."—New York Mail and Express.

A MONUMENT on a grand scale is about to be erected in Mountain View Cemetry, Oakland, Cal., by Dr. H. D. Cogswell, a gentleman of wide charity and great wealth, who has achieved popularity through his many benefactions, in memory of himself. The monument is to be seventy feet in height and will cost upward of seventyfive thousand dollars. The millionaire physician himself designed the beautiful and artistic work, as well as several drinking fountains presented by him to other cities.

It has long been thought an excellent thing to mix silver with the other metal when a bell was to be cast, and many pious persons have rejoiced at the thought that the silvery chime of the church bell was in part due to their gifst. Now comes a writer in an English scientific paper with this paragraph: "I once asked a foreman in a well-known bell foundry whether putting silver in a melting pot was of advantage. He replied of great advantage-to the founder, as the silver sinks to the bottom; the founder pours off the copper and tin, and when the silver has cooled puts it in his pocket.

WATER is colder at the bottom than at the surface. In the many bays on the coast of Norway the water often freezes at the bottom before it does above. Waves are very deceptive. To look at them in a storm one would think the water traveled. The water stays in the same place, but the motion goes on. Sometimes in storms these waves are forty feet high and travel fifty miles an hour, more than twice as fast as the swiftest steamer. Some eight or ten of the most prominent business men of Du Quoin, Ill., have just been euchered out of amounts ranging from \$200 to \$500 each, aggregating altogether West India and Pacific Steamship Company \$4,000 or \$5,000 or more, by Hugh Magee, to run weekly steamers between Liverpool who for the past two years has been the manager of the Evaporator and Dry House Com- pay. pany in that place. Magee settled up all his counts last Friday, giving each of his creditors a check for the amount due on the Exchange or Du Quoin Banks and in many instances giving a check for alarger amount than the bill called for, receiving the difference in cold cash. Early Sunday Magee boarded a west-bound Cairo Short Line train, and it is presumed went to St. Louis. As soon as the banks were opened the checks began rolling in, and were, of course, refused as worthless, as Magee had not a cent on deposit at either bank. Attachments were at once made upon two car-loads of dried fruit standing on tracks here ready for shipment. Just what consideration the merchants will derive from the sale of the fruit remains to be seen. Anyway Magee is gone, and the merchants are out many hundreds of dollars. Among the heaviest losers are the St. Nichoas Hotel, D. M. Quatott Hardware Company, Brooking's Drug House, James Bell Lumber Company, Star Clothing House, Duquoin Iron works, Siekman's Shoe House, and Mifflin's restaurant. Magee has relatives, it is said, in Chicago, and the establishment he had charge of was established here July 18, 1887, by C. E. Prescott & Co., of Chicago, the company being young Magee's uncle. The business will probably be continued by the creditors. The plant is the an artificial leg. Storries of the skill of argest one in the West. Magee is a young man and was universally popular here.

## FOR THE LADIES.

Gladness Out of Sadness-The Two Ages-Photographers, etc. etc.

The Two Ages. Ho! for the days of sword and lance,
Of chivalry and bold romance,
When lovers had some sort of chance
To win a maiden fair:
When rivals all were free to fight
Their quarrels out by candle light,
Or, in the tourney, every knight
His old accounts would square.

Sir Percy saw his lady smile
Perchance on Sir Olive Ile,
Which straightway raised that noble's bile:
Then tooth and nail would ride
These gallant knights, and deftly break
A lance, or head, for her sweet sake;
And he who won had leave to take
The lady for his bride.

Now I have rivals, six or eight, Whose noses I could dislocate
With much delight, I beg to state,
If laws were only lax;
Yet I may only scowl or frown
Whene'er we meet about the town,
Or at the most to run them down,
To friends behind their backs.

Alas! in these prosaic days
A lover treads no primrose ways;
He dare not even sing love's lays
Beneath her walls at night,
For fear that an alert police
Should run him in for breaking peace
Or alien bootjacks made him cease
Hurled by a hand of might.

Once wooing was a noble art; It needed but a valiant heart To safely speed the flying dart In those brave days of old. There was no coin to win love's gage Without some higher heritage.
Well may we miss the Golden Age
In this, the Age of Gold! -Woman.

### Gladness Out of Sadness.

I have been impressed with the curious fact that many of our most popular humorists write from a heart full of sorrow. They are often men who have uncommon domestic affliction to bear; such trials and troubles as sometimes drive other men to drink, and not a few to suicide. But the genuine humorist, like Goldsmith, or Tom Hood, or the late John G. Saxe, or the unfortunate Artemus Ward, is usually a man of many sorrows, who smiles in spite of himself while looking on the dark side of life. I once lived in New York in the same house in which Artemus Ward boarded. It was very near what was then known as St. John's Park, but which is now the great Hudson River freight depot. Poor Ward, after giving a brilliant lecture up-town, would return to his temporary home, his pockets stuffed with money. He would usually come home intoxicated and throw himself upon the bed, after emptying his pockets and scaterring their contents over the "I don't care for money," he would say. "I don't care for fame! I am the most miserable and unhappy of

The world knows of the misfortunes which overwhelmed John G. Saxe; and how he lived for years a prey to melan-choly, the wreck of a railway accident, and almost the only survivor of his once large and interesting family. I remember him well in his prime, when he resided in a pretty brick cottage on Union Street, in the lovely little city of Burlington, Vt. Then he had a wife and a large family of children. He was in the best of health, of perfect physical build, as tall and handsome a fellow as one could wish to see. He was at the height of his fame as a poet and lecturer, and had nothing to do but travel over the country and "scoop in the dollars," as Eli Perkins does nowadays. It seemed as if fortune smiled upon Saxe, and as if his days of joy and sunshine would never end. I was a student in college then, and I remember how I used to envy him his happy lot, The years flew swiftly by, and time wrought sad havoc with the Saxe family, as well as with the genial poet himself. His wife died, and all of the children save one followed her to the grave, victims of consumption. I was at the wedding of one of Mr. Saxe's sons, in New York City, when he married a daughter of the late Judge Sutherland. In a few years both bride and groom had passed away, and the parents on both sides are now dead. poet's recent death and its sad circum-

stances, it is unnecessary to speak. J. M. Bailey, known as the Danbury, Conn., News man, is another example of a humorist who has more than his share of trials. He is a large, handsome man, with black eyes and dark hair, now plentifully sprinkled with gray. He lives very quietly in Danbury, Conn., and is either always at his little office on Main Street, or at his modern residence, with its pretty green lawns and beds of flowers. He never spends an evening away from home, and has not been outside of Danbury for years. His poor wife has lost her reason and demands all of his attention. She thinks nobody in the world can do anything for her except her husband. He must dress her and arrange her hair, and attend to all her wants. She is like a child, and he gives her all of his affection, time and atten-His devotion is something heroic and beautiful. Upon one occasion, so the people of Danbury say, she went to his office and asked him to do up her hair. It had fallen down. He arranged it for her in the pleasantest manner possible, did all she asked without the least annoyance, and then took her home. Such are the facts concerning some of our well-known humorists. Many more about others might be given, but we have enough to show that there is a dark as well as a bright side to the life of those who afford the public so much amusement.-Fuller Walker, in Kansas

Photographers are frequently puzzled to find means of disposing of the many toilet articles which ladies leave behind them in the dressing room. Paints, powder, false hair, and chamois skin do not retail at a very profitable price sec-ond-hand. A Philadelphia photographer has established a counter where he sells these articles as a sort of annex to his regular business. The "goods" are fixed up, put into new boxes, and sell nearly as well as when new. Of course the ladies never return to claim the

property Photography on a small scale and with amateur equipments is now a favorite pastime with Englishmen of leisure. Even the peers have taken up the craze and carry their cameras with them to race-tracks, cricket matches, and rowing regattas-everywhere in where a pretty picture may be caught. The spectacle of a member of partiament on a crowded race ground planting his tripod and aiming it at some famous horse or noted jockey must be rather strange, but according to an east-

ern correspondent it is not a rare one. Almost any photographer's studio of any importance in the country has, at one time and another, been visited by some notable people, and there is not a few in the business who can tell very amusing stories about the whims of greatness when it sits for a picture.
Politicians and members of the legislature are not, as a general thing, hard to but he can be melted.

capt. Carvell's Dairy.

A young Vicksburger who holds an official position on the terraced hill was down aboard of the Anchor line steamer City of Providence when she was here last. He refused to tell what particular charm the City of Providence had for him on that special occasion, but he did tell a good joke on a young lady passenger who was on board at the time. A party of ladies and gentlemen were sitting on the boiler deck talking, when a man came up with a couple of cans of milk. The young lady was a city girl and knew little or nothing about cows and how they are cared for, and she innocently asked Capt. Carvell if he milked cows on the boat.

"Oh, yes," replied the captain, "we have all sorts of cows on board here, and milk them regularly." The captain thought this was a pretty good joke, as the idea of running a dairy on a steamboat was a little novel, but he was not prepared for the young lady's next question, the night of superstition, the night of superstition, the night of superstition, the night of serven colors? And when God with the rainbow wrote the comforting thought that the world would never have another deluge he wrote it on the scroll of the sky in ink of seven colors. He grouped into the Pleiades seven stars. Rome, the capital of the world, sat on seven hills. When God would make the most intelligent thing on earth, the human countenance, he fashions it with seven features—the two ears, the two ears, the two ears, the two ears, the two ears, and we gradually shed it for another body after another seven years, and so on, for we are as to our bodies, september the world would never have and the mouth. Yea, our body lasts only seven years, and we gradually shed it for another body after another seven years, and so on, for we are as to our bodies, september the world would never have and the mouth. Yea, our body lasts only seven years, and we gradually shed it for another body after another seven seats, and the seven thunders.

I believe in beautiful candlesticks. The candlesticks that God ordered for the ancient tabernacle were something exquisite. They were a dream of beauty carved out of loveliness. They were made of hammered gold, stood in a foot of gold, and had six branches of gold blooming all along in six lilies of gold each, and lips of gold from which the candles lifted their holy fire. And the best houses in any sity ought to be the churches—the best built, he best swept, the best windowed, and the set chandeliered. Log cabins may do in eighborhoods where most of the people live in palaces. Do not have a better place for yourself than for your lord and king. Do not live in a parlor and put your Christ in a kitchen. "Woodman spare that tree," ought to be the motto of every presidential year. If the scarcity of timber is such that the Governor must yearly proclaim a treeplanting day, it looks like barbarism to make an attack on the young and thrifty timber every four years, for the raising of poles that mean nothing. Democrats are most to blame for they use the best timber, every pole costing at least two of the finest young hickories in the forest. The practice ought to be stopped at once, for the timber thus wasted cannot be well spared.—Sentinel.

A Garden Barometer.

One of the simplest of barometers is a spider's web. When there is a prospect of rain or wind, the spider shortens the filaments from which its web is suslong as the weather is variable. If the insect elongates its threads, it is a sign of fine, calm weather, the duration of which Office at Corner Cross and River Streets. may be judged of by the length to which the threads are let out. If the spider remains inactive, it is a sign of rain; but if, on the contrary, it keeps at work during a rain, the latter will not last long, and will be followed by fine weather. Other observations have taught that the spider makes changes in its web every twentyfour hours, and that if such changes are made in the evening just before sunset, the night will be clear and beautiful.—

Styles in Conversation. There is a fashion in conversation among women. Last winter, whenever there was a gathering of the gentler sex, the kitchen women, who had never thrust their delicate hands into dough or reddened their fair complexion before an oven, talked like experts in the art of cooking. It was the result of the fashionable "cooking classes" for young la-dies. Some years ago the topic was music. It was the first season of German opera at the Metropolitan opera house, and it was deemed essential that every woman should exhibit some knowledge of the subject. This year the topic is outdoor amusements, and the man who knows it not is dumb in the presence of fashionable womanhood.—Hotel Gazette.

CTATE OF MICHIGAN, COUNTY OF WASHbenaw, ss. At a session of the Probate Court
for the County of Washtenaw, holden at the Probate Office in the city of Ann Arbor, on Friday, the
26th day of October in the year one thousand eight
hundred and eighty-eight. Present, William D.
Harriman, Judge of Probate. In the matter of the
estate of Jacob Slawson, deceased. On reading and
filing the petition, duly verified, of Julia A. Slawson, praying that administration of said estate may
be granted to W. Herbert Slawson or some other
suitable person. Thereupon it is ordered, that
Monday, the 26th day of November next, at ten
o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs at law of
said deceased, and all other persons interested in
said estate are required to appear at a session of
said Court, then to be holden at the Probate Office,
in the City of Ann Arbor, and show cause, if any
there be, why the prayer of the petitioner should
not be granted. And it is further ordered, that
said petitioner give notice to the persons interested in said estate, of the pendency of said petition
and the hearing thereof, by causing a copy of this
order to be published in the Ypsilantian, a newspaper printed and circulated in said county three
successive weeks previous to said day of hearing.
